Mission

Paste, Play, Discover :: Your Multilingual Video Adventure!
Seamlessly explore YouTube videos with our platform. From translating content to accessing detailed transcripts, asking questions, and even breaking language barriers, we've got it all. Simply paste your YouTube URL and open the door to a world of multilingual possibilities

TABLE CONTENTS

INTRODUCTION

Have Youtube videos ever been long, cumbersome and difficult to understand ?

Students at RV University collaborated with BroadRangeAI under the mentorship and guidance Mr. Ramarao Kadiyala

CREATE MULTILINGUAL PLATFORM

 **Overcome language barriers
Enhance understanding YouTube videos**

 **Seamless communication across languages
Wider accessible information exchange**

The platform serves as a 4-in-1 solution.

Special Regards to Prof. Sanjay Sir and Prof. CVSN Sir for giving the internship opportunity

MULTILANGUAGE URL

GET AI-GENERATED ANSWERS FROM YOUTUBE TRANSCRIPTS!

ENTER YOUTUBE URL:

e.g., https://www.youtube.com/watch?v=your_video_id

PROCESS TRANSCRIPT   **PRINT TRANSCRIPT**

ASK A QUESTION:

Your question here

TARGET LANGUAGE:

Select Target Language

ASK QUESTION

DETAILED TRANSCRIPTS

To understand a particular moment taking place in a video with a *time stamp* without watching it !!!

ASK ANYTHING

To know the content better in favorable languages ask any question related to the video

PROJECT REQUIREMENTS

TRANSLATE AWAY

Get the answers to your questions in your preferred language

ONE TAP MAIL

Just enter desired email id and tap on the send button
It not only send transcripts but also answers question asked
with in-built subject creator system in mail

Platform's Architechture

TOOLS USED

- FLASK: Flask-based web application with routes for user interaction.

- PYTHON

- OPENAI

Libraries & Packages

URLs

1. urllib.pars

- Provides functions for parsing URLs
- Breaking down URLs into components like scheme, netloc, path, etc
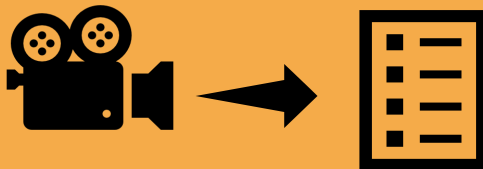

2. parse_qs

- Parses query strings from URLs into a dictionary of parameters and values

Transcripts

1. YouTube_transcript_api:

- Allows fetching and working with YouTube video transcripts programmatically

Prompting

1. **Openai**

- The latest GPT-4 model with the 'openai.ChatCompletion.create' method is used to generate the answers.
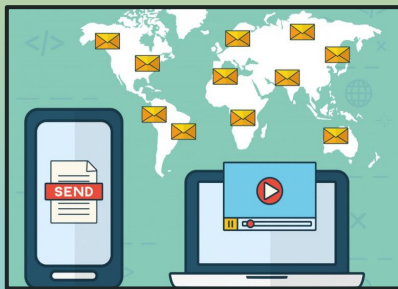

Libraries & Packages

Translation

1. Langdetect

- Language detection library that can identify the language of a given text

2. googletrans.Translator

- A wrapper for Google Translate API, allowing language translation using Google's translation service

Emailing

1. smtplib

- A library for sending emails using the Simple Mail Transfer Protocol (SMTP)

2. email.mime.text.MIMEText

- Part of the Python standard library for creating MIME (Multipurpose Internet Mail Extensions) text objects for emails
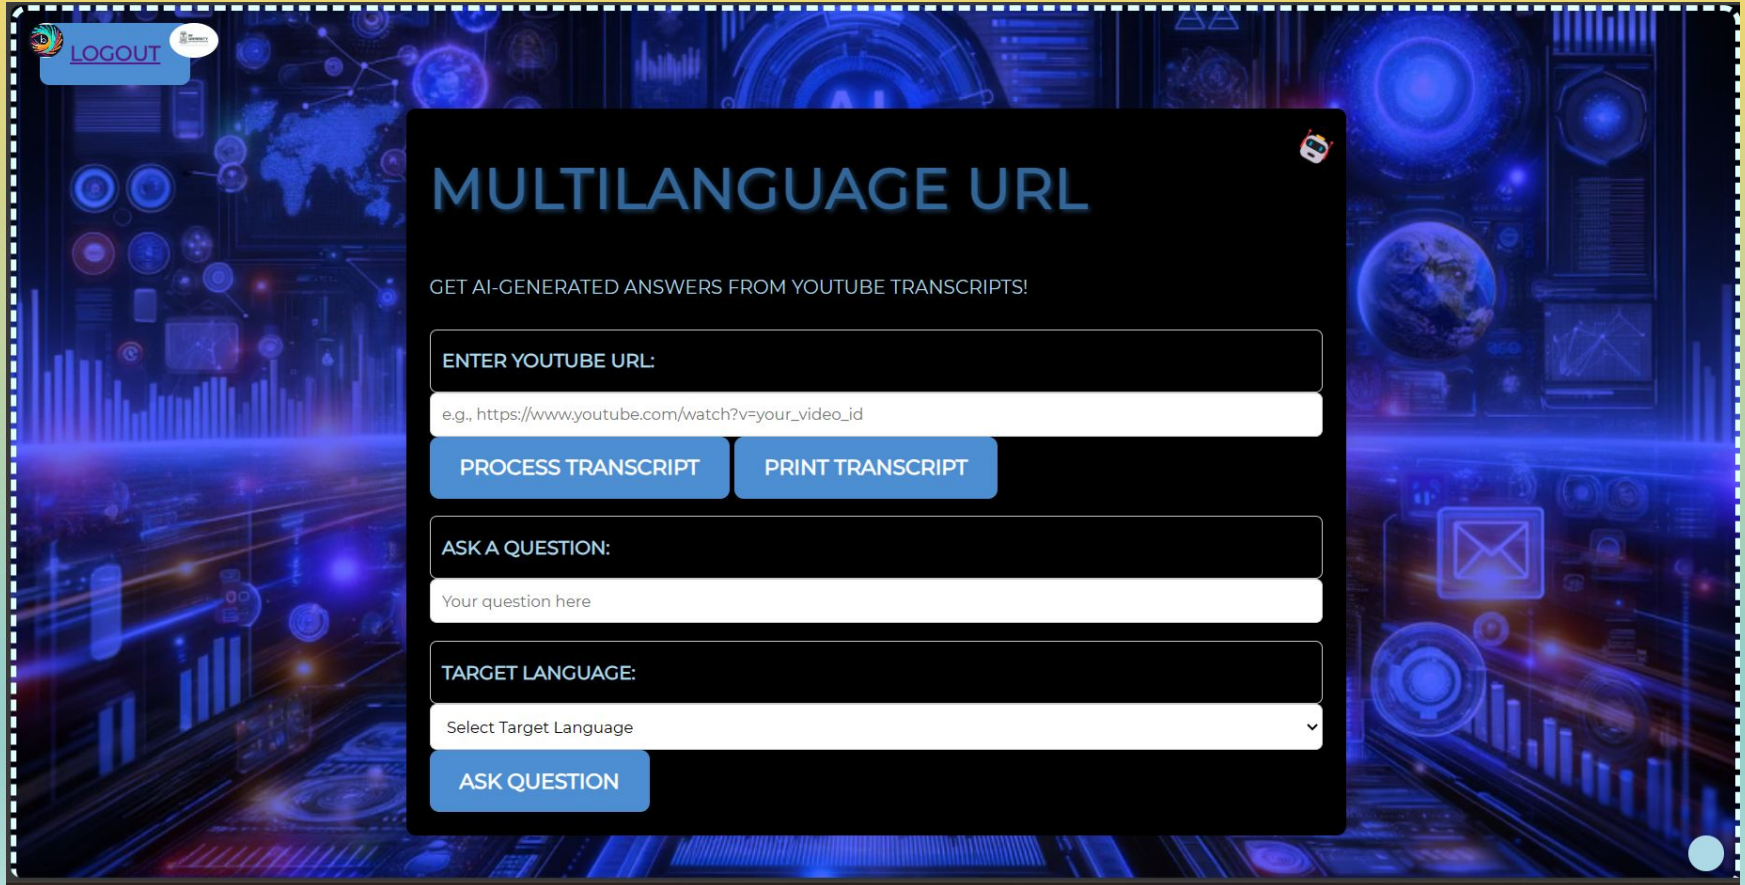

3. email.mime.multipart.MIMEMultipart

- Part of the Python standard library for creating MIME multipart objects for emails

Webpage Asthetics & Appearance

Conclusion

What is achieved and the future scope

Platform Achievements

- On YouTube URLs inputs, receive accurate transcripts with timestamps

- Platform's multilingual question-answering feature
  - Breaks down language barriers
  - Enables to seek information or clarification in their preferred language

- Convenience of
  - sharing the transcripts
  - Q&A results via email enhances the platform's versatility

Future Scope

- The non-transcript videos approached by voice translation

- Exclusive feature of a user history
